

ZipLink® Belts

Win Your Race at the Pit Stop!

ZipLink® - Increase your production time

Ammeraal Beltech is a leading manufacturer of process and conveyor belting with an established reputation for developing innovative solutions for belting applications.

Working closely with OEMs and end users Ammeraal Beltech has developed a range of ZipLink® Belts: a special design link fabric in combination with top covers giving superior performance. Main benefit is the striking increase of your production time.

ZipLink® Belts:

- **Minimize replacement time on site by 75%**
- Eliminate splice failures
- Eliminate damages to transported products
- Eliminate damages to machine parts (drums, slider beds) due to mechanical fasteners

ZipLink®, ideal for whatever application where belt replacement time is an issue, for example:

- » **Cardboard industry**
bridge raising and bridge, slitting, cross cutting, box folding, stacking, delivery
- » **Wood processing**
grinding, sanding, polishing, braking, sawing, painting, pre-compressing
- » **Tyre industry**
uncured rubber transport, general process and handling
- » **Airports & logistics**
scanning, check in, collectors, inclined transport, airplane loading
- » **Tobacco processing**
conditioning, weighing, transport
- » **Magnetic conveyors**
- » **Food applications**

Belts that join instantly

Easy, no specific training required

AMMERAAL BELTECH ZIPLINK® BELT RANGE	» Shortest production downtime » Reduced maintenance time and cost » Extended belt service life » Ideal for difficult locations	Increased production time
	» Protects both product and conveyor from being damaged » Extra high stability allows for easier tracking » Safe on-site installation, no heavy equipment needed » No loss of strength in the joint area	Operational safety
	» Low friction bottom version helps reduce energy consumption due to the absence of splice areas	Less energy consumption
	» Strongest in-house splicing; no outside fitters required » No need for any special tools or presses » Possible repair of damaged belt sections	Economical use
	» Choice of top cover materials tuned to the application » ZipLink® Belts have a proven track record worldwide	Proven technology

ZipLink® is an innovative belt range which is specially designed to offer benefits in a variety of different industries. Quick and simple installation or repair help to lower costs and reduce downtime. The design allows for repair or replacement of just small sections of the belt.

The largest range of covers ... and we can make your specific belt on demand

CR = cold resistant, FG = foodgrade, FR = flame retardant, HR = heat resistant, HD = hydrolysis resistant, OR = oil resistant

Easy replacement
of the complete
belt or of small
sections in the
event of damage.

Achieve
considerable cost
savings: easy to
use tooling kit and
no specialised
outside fitters
required.

ZipLink® is a breakthrough in belting design that combines cover materials with a structured link mesh that can be easily spliced at any length into a continuous belt without the need for special tools, presses or other equipment.

The ZipLink® construction eliminates points of weakness because there is no loss of strength in the splice area, making the belts stronger so they last longer than belts of other seamed or fused materials.

ZipLink® provides long life and flexibility for multiple applications. The belts can easily and quickly be changed without accruing significant downtime or expensive overtime. After converting to ZipLink®, time and personnel required to change belts may be reduced by more than half.

Complete toolbox
available, including
instruction CD

Working instruction

Score the back and lubricate the pin.

Pop the pin out at 1.5 cm from the edge.

Gently pull the pin out using pliers.

Carefully cut the top cover.

Press the ends back together firmly.

Pass the wire through and cut the excess.
